

PA International

proven **partner** for product manufacturing in **China**

PA International is a **globally recognised China Manufacturing consultancy.**
We provide a **complete turn-key engineering service** from research and design support through to mass production.

We support businesses through our **expertise in Manufacturing** and deliver value-added services that enable companies to manage, improve and grow their businesses.

12

years of supporting engineers and companies in making parts and products in China

3

original founders still form a backbone of the company, but now surrounded by team of dedicated professionals

15+

awards been won by our clients with products that we assisted them to manufacture

1

office in China & Worldwide Reach

98%

of our clients are international companies

The products and components that we build for our clients, create experiences that drive **business success** and **build brands**.

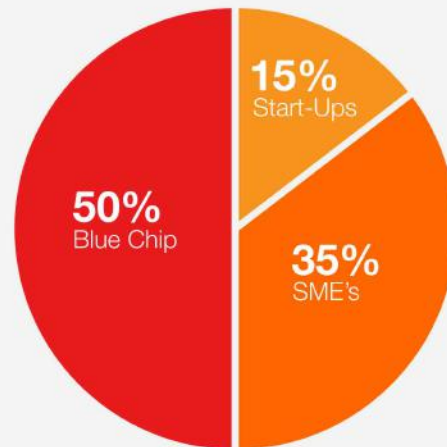

and we're **extremely good** at what we do

We manufacture components for all markets

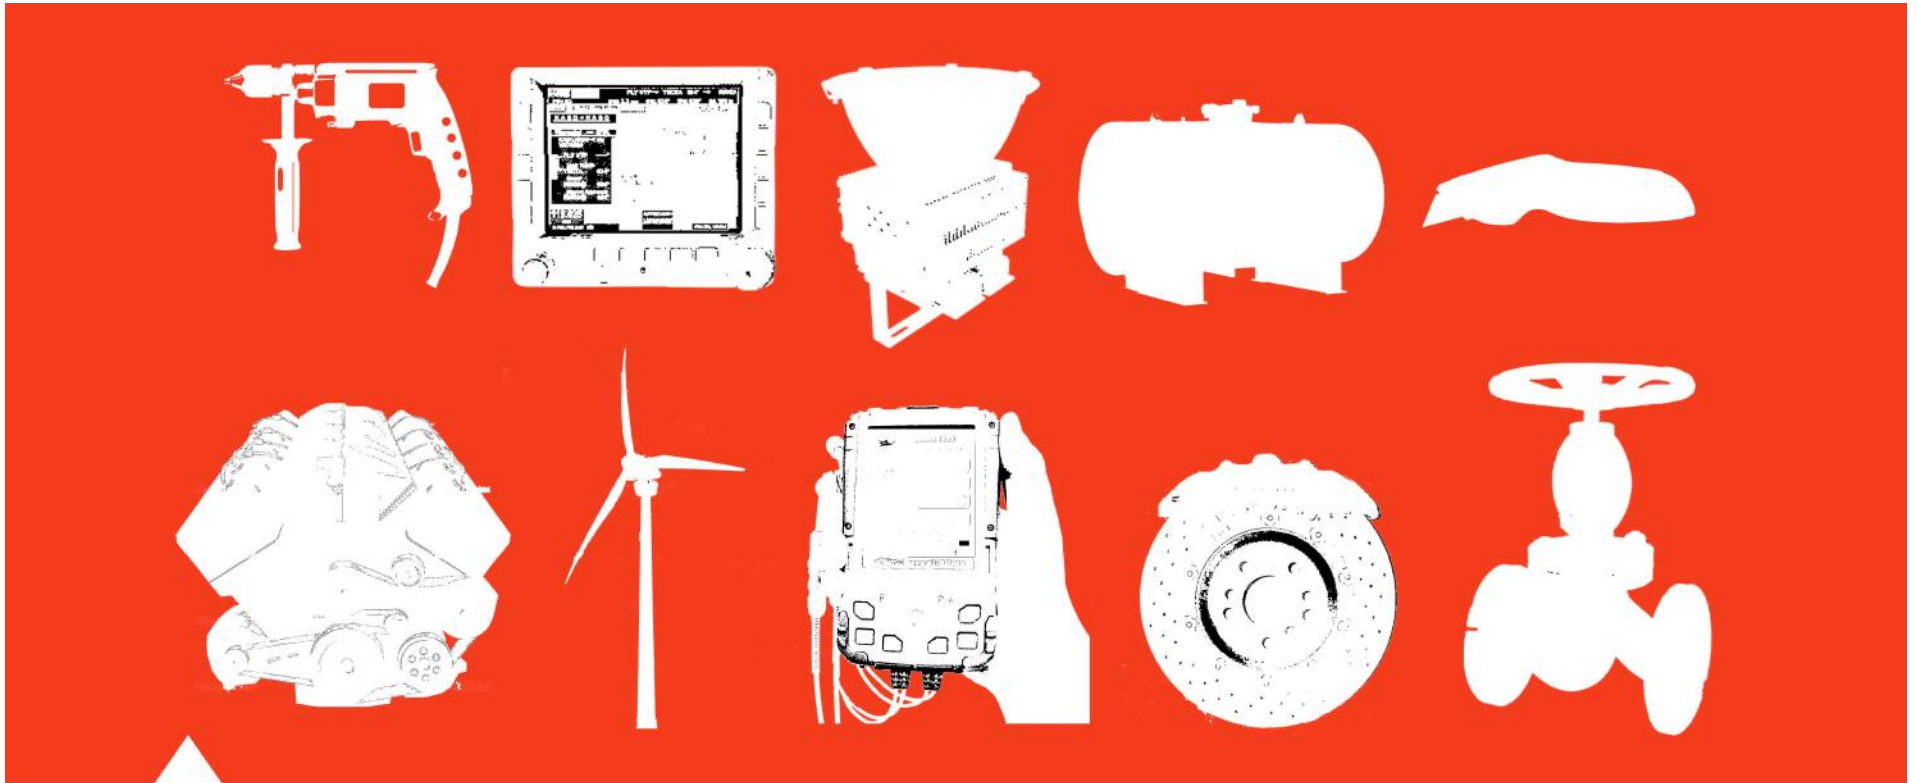

Each year we assist to engineer, price and manufacture over **20 new parts and products**, for our 160+ client base

There is no project **too big** or **too small**

We work with all kinds of companies, from one person **start-ups** to established **global leaders**

Over **65%** of our quotes are successful and commercialised

We focus on people
People are our ultimate asset. We build relationship first, business comes naturally.

We ask the **right** questions

Uncovering **engineering insights**, making sure we're solving the **right problems**

Our technical and problem solving ability **minimises the risk**
to market and to our clients

We provide meaningful and useful feedback

That guide and assist engineers in creating the product

**We can create the whole solution
From part to product assembly to brand packaging**

**What sets us apart from other engineering
consultans and manufacturers**

Focus

We have an expert team with diverse skills gained from working on broad spectrum of products from Avionics to consumer goods

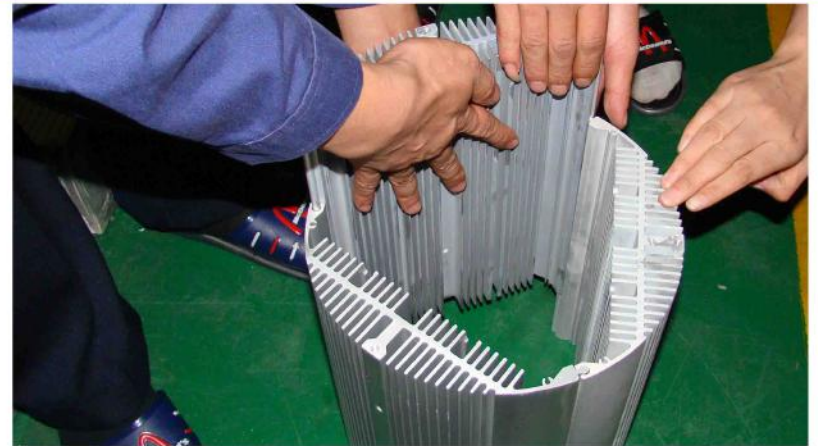

Capabilities

We have proud heritage of manufacturing excellence delivering quality product and outstanding customer support

Culture

We have reputation for solving technical challenges and focused on customer service

Relationships

We create great client relationships

I'd like to thanks PA international for the great work you did on the heatsink of our project. The quality is really nice.

You were very reactive and competitive for this project.

I hope we'll have the opportunity to work together again.

Sebastien
France

P&A International have provided me with the best service possible, from Communication to samples and then production they have proven to be outstanding in all areas.

Gary
Australia

PA International make sourcing in China easy, efficient, and cost effective. They are a one stop English speaking agent for a broad range of high quality production facilities.

With English speaking specialist for each manufacturing discipline their technical support is communicated clearly, and delivers great results

Ben
Australia

Toolmaking, product quality and service were all excellent. Communications were all handled very professionally, absolutely no problems anywhere along the way. We are very pleased to have been referred to PA International and would not hesitate to use them again or to recommend their services.

Rob
Australia

Our experience with PA International has been one of great professionalism, comprehensive experience and outstanding customer service.

Mario
Australia

Our experience with PA International has been very good. We have found the team very professional, prompt and focused on detail. We have no hesitation in recommending PA International.

Kevin
Australia

Proven P&A process

01

Discovery + Insights

Understand the requirements

- Product requirement definition
- Design and materials analysis
- Application analysis & insights
- Product manufacturing strategy & road maps
- Target cost

02

Search + Price

Identify subcontractors and quote project

- Locate suitable vendors
- Obtain quotes
- Quotes review with client
- Shortlist and engage vendors
- Work out suitable manufacturing process

03

Develop + Evaluate

Produce tooling & Evaluate samples

- Produce working prototypes
- Prototype testing & verification
- Tooling design & engineering
- Off-tool samples inspection, testing & verification
- Finalise production documentation

04

Deliver + Monitor

Mass production and quality control

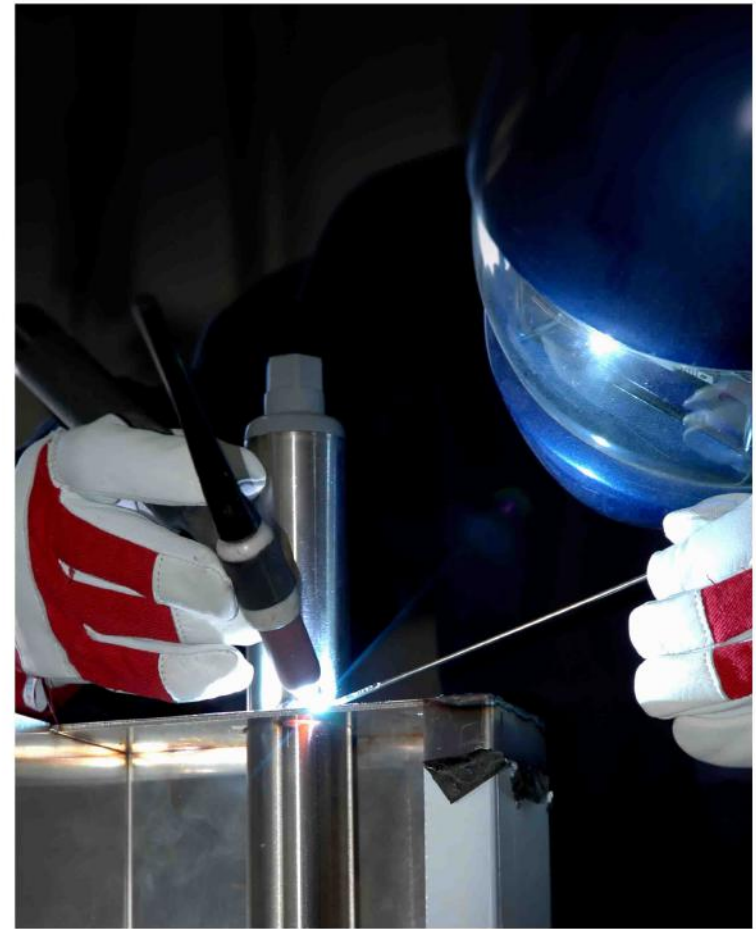

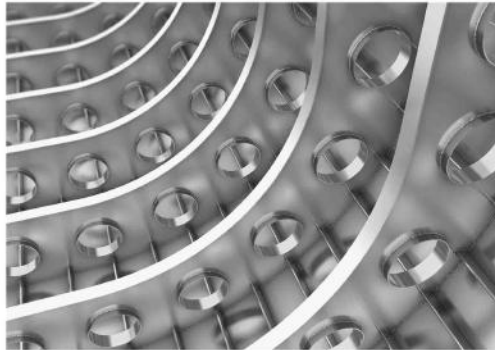

- Production process implementation
- Manufacturing quality control
- Packaging and logistics management
- Ongoing improvements
- Back up vendors management

Our Solutions

Metal Fabrication Service

High Quality Manufacturing in China

Comprehensive metal fabrication service including CNC stamping, machining, metal structures assembly & general engineering. Highly flexible, allowing you to choose specific manufacturing process for a single component, or alternatively, outsource the entirety of your manufacturing and assembly work. You also have the ability to tailor the service levels in a way that works best for you and your business.

Aluminium

High Quality Manufacturing in China

Aluminium diecasting, custom extrusions and heatsinks made to highest specification.

Working from drawings or samples provided, our expert die casting and extrusion designers and toolmakers will deliver extrusions with high tolerance and lowest possible cost. Working closely with you we will select suitable process and alloy to design the tooling to suite your application.

Heatsinks & Heatpipes

High Quality Manufacturing in China

As the electronic components and devices downsize the biggest challenge becomes cooling. Heat Pipe technology is designed to resolve heat transfer challenge. In combination with aluminium heatsink it becomes the ultimate solution. Ask us for a custom HeatPipe to be made for your application.

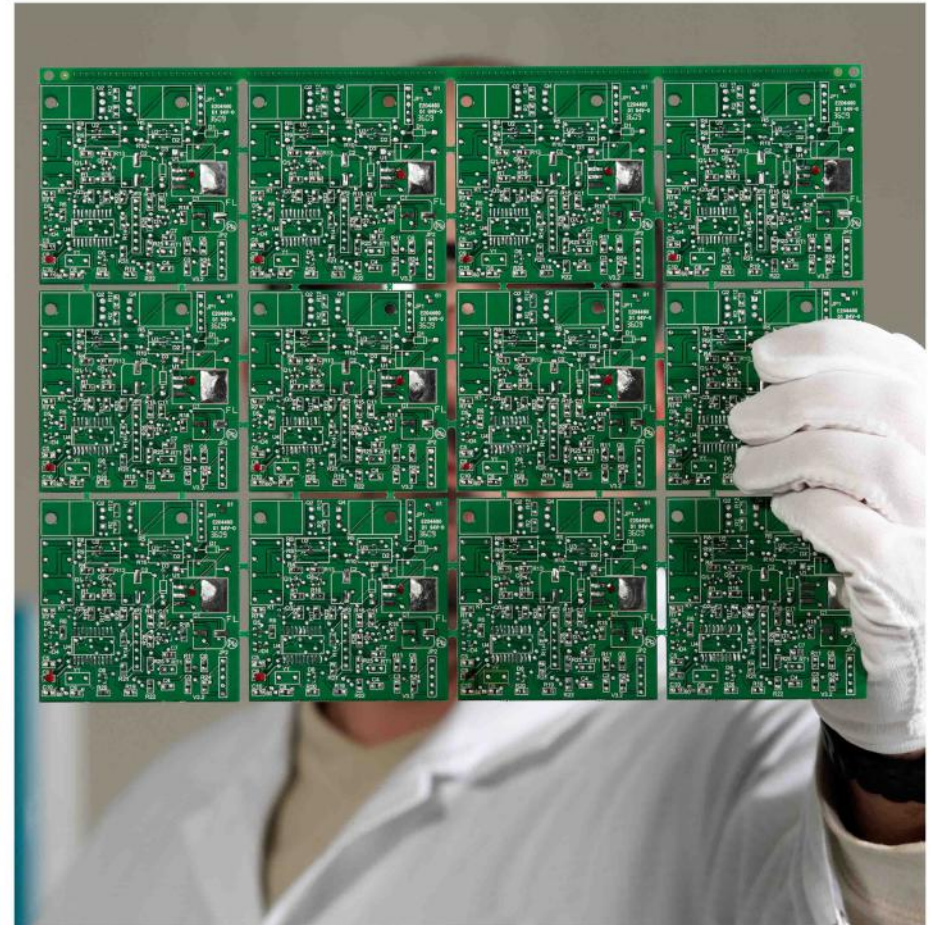

Electronic Components

High Quality Manufacturing in China

Wiring Harnesses, Power Transformers, PCB and PCBA are part of any electronic device. At P&A, we've got it covered.

Working from drawings or samples provided, our expert engineers will deliver suitable solution. Be it small sample run of parts or mass production measured in millions of components. We also provide assembly service known as Box Build, that can consist of electronic and mechanical parts.

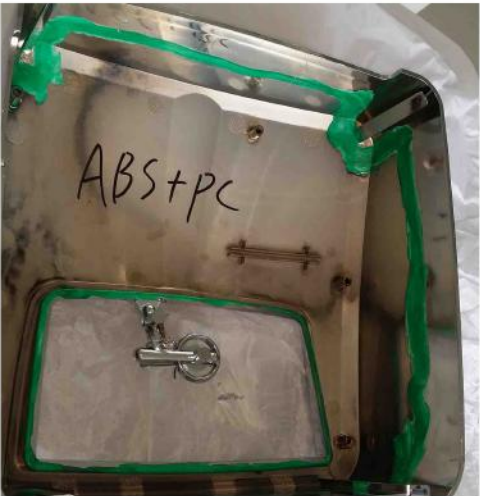

Functional and environmental tests are offered on demand.

Plastic Injection Moulding

High Quality Manufacturing in China

Vertically integrated, P&A offer a complete plastic part manufacturing service that starts with plastic injection mould manufacturing, moulding of plastic parts, following machining of parts if necessary, painting or chroming finish and part assembly if desired.

Thank You
