

Contract Manufacturing in China — Capabilities & RFQ Guide

P&A International — one engineering partner across metal, plastics & finishing ·
www.pa-international.com.au

Use this to brief us on a project that spans more than one process. Share what you can and one dedicated engineer returns a proposed approach and indicative pricing, typically within 48 hours.

1. The project

- What the part / assembly is and its application
- Which processes it needs (extrusion, casting, fabrication, stamping, machining, moulding, finishing)
- A model, drawing or sample to work from
- Annual volume and target cost

2. Materials & quality

- Materials and grades, or ask us to specify
- Tolerances and any critical features
- Compliance: RoHS, REACH, certificates, inspection reports
- Any standards specific to your industry

3. Delivery & programs

- Prototype vs production timeline
- Assembly, kitting and private-label programs
- Logistics and delivery requirements
- Single point of contact across all processes

Email this with your drawing to support@pa-international.com.au or use the quote form on the page.

Capabilities — Quick Reference

One partner, many processes

Processes

Process	What we deliver	Page
Aluminium extrusion	Custom profiles, finishing, fabrication	/aluminium/extrusion/
Casting	Die, gravity, investment, sand casting	/aluminium/diecasting/
Fabrication	Aluminium & steel cutting, welding, finishing	/aluminium/fabrication/
Stamping	Single-stage & progressive pressed parts	/metal/stamping/
Machining	CNC milling, turning, 5-axis, titanium	/metal/cnc-machining/
Moulding	Plastic injection moulding & tooling	/plastic-injection-molding-company/

Why one partner

Benefit	Detail
One engineer	A single dedicated engineer owns multi-process projects end to end.
Vetted network	Every supplier in our network is ISO 9000 certified or better.
Free samples	Free off-tool samples with quality-assessment reports before mass production.
Single contact	One point of contact for quoting, samples, production and logistics.
Private label	Complete parts, assemblies or private-label products.

How we work: P&A International is an engineering-led contract manufacturer. One dedicated engineer engineers your part, free off-tool samples are provided before mass production, and volume is produced through our vetted partner-factory network — every supplier is ISO 9000 certified or better.
